1. Style, Strengths And Weaknesses

Style read: practical and combative, especially with Black. The most important practical clue is not a single opening name, but the repeatability of his early structures shown below.

Main strengths	Main weaknesses
large public sample with repeated tournament structures, so his main habits are visible; clear White comfort zone around Reti/KIA fianchetto, Queen-pawn with c4; clear Black comfort zone around Gruenfeld/neo-Gruenfeld ...d5, Sicilian Defence; recent activity in the sample, so old repertoire notes should not be used alone	predictable first-move families as White if you prepare the exact move order; repeated Black structures that let you choose a targeted anti-system rather than broad prep; some repertoire clustering: he can be made to solve a prepared branch rather than choose freely

Fianchetto shell note: in 69 d4/flank games where he used ...Nf6/...g6/...Bg7, the split is ...d5/Gruenfeld-ish: 36, ...d6/KID-ish: 28, no early d-pawn: 5. Use the early d-pawn choice as the cue: ...d6 means KID/Benoni thinking, ...d5 means Catalan/Gruenfeld-style central pressure.

5. Game Plan For Lachlan

If You Are Black

Against 1.Nf3/c4/b3, claim the centre with ...d5 or ...c5, avoid a passive copycat setup, and watch the Bg2/Bb2 diagonal before loosening dark squares.

If You Are White

If you play 1.e4, expect Sicilian structures. Either prepare your main anti-Sicilian branch deeply or steer toward your Catalan/Reti comfort instead of giving him his best practical arena.

Against ...Nf6/...g6/...Bg7, stay in Catalan/Reti mode: c4, g3, Bg2, d4, keep central tension, and decide early whether dxe5/dxc5 clarifies in your favour.

Practical Match Plan

Do not chase tactics unless the forcing line is fully calculated; make compensation prove itself.

Trade into better structure when he accepts isolated pawns, backward pawns, or a weak colour complex.

Prepare one forcing branch against the top repeated setup, then spend the rest of prep on plans and pawn breaks rather than memorising sidelines.

6. Before-The-Round Checklist

Review Black setups against 1.Nf3, 1.c4 and b3: choose centre-first development and note diagonal tactics.

If considering 1.e4, review your anti-Sicilian choice or choose Catalan/Reti to avoid his repeated Black family.

Review White rep / Reti and Catalan files against ...Nf6/...g6/...Bg7; decide dxc5/dxe5 trigger points.

Bring one practical target to the board: a pawn break, a trade into better structure, or a line that removes his favourite attacking plan.
