## Online Account Context

Very strong repertoire overlap: almost exclusively 1.e4 as White; as Black both sets feature 1...e5/Petroff against 1.e4 and Dutch/QGD-style answers to 1.d4. The raw score was low only because the Chess.com sample is huge and more varied.

## Stockfish Sample

Stockfish 17.1 depth 8 sampled 56 games and 1609 target moves. Average loss was 0.35 pawns; serious-error rate 9.2%; blunder-rate 1.9%.

| Phase      | Moves | Avg loss   | Serious |
|------------|-------|------------|---------|
| opening    | 336   | 0.19 pawns | 3.6%    |
| middlegame | 1145  | 0.39 pawns | 10.7%   |
| endgame    | 128   | 0.4 pawns  | 10.9%   |

## Strengths

- Very consistent first move as White: the prep target is 1.e4, not a broad guessing game.
- Comfortable in open Sicilian and e4-e5 structures where piece activity matters.
- The Chess.com account is high-confidence and active, adding a large practical sample even if blitz/bullet contains experiments.

## Weaknesses To Test

- The online sample has experimental extras, so forcing him into less habitual OTB structures can create independent decisions.
- When his Black repertoire goes through 1...e5/Petroff, you can choose whether to test memory or sidestep it entirely.
- His prep is likely broad but not perfectly unified across OTB and online games; avoid giving him the exact branch he repeats most.

## Your Strategy

- With Black, prepare one robust answer to 1.e4 and a concrete plan against Open Sicilian/Italian-style development.
- With White, decide your anti-1...e5 policy before the game: either go straight at the Petroff/e4-e5 files or choose a sideline that keeps pieces on.
- He is dangerous when activity is automatic, so make him spend time on pawn-structure choices rather than only piece development.

## Prep collection notes

- Chessscope checked: player page advertised 56 broadcast games; per-game crawl was skipped because the full Lichess broadcast database was streamed and filtered by FIDE ID/name.
- ChessBites public game-page pass added 9 unique games from 9 fetched PGNs.
- Duplicate cleanup on 2026-06-19T21:09:44+00:00: removed 29 duplicate Files-side PGNs, rewrote the app-side source PGN to 117 unique games, and rebuilt the OTB database from 145 to 116 games.
- Duplicate cleanup on 2026-06-19T21:11:17+00:00: removed 10 duplicate Files-side PGNs, rewrote the app-side source PGN to 107 unique games, and rebuilt the OTB database from 116 to 107 games.

## Method

Opening and result statistics were calculated from the deduped combined app-side OTB prep PGN. Original source bucket counts are kept only as collection provenance and can exceed the final unique game total. Stockfish sampling checked target-side moves from move 5 onward in recent and result-diverse OTB games. Chess.com account comments use the existing Southall opening-comparison audit and are not merged into the OTB statistics unless explicitly stated.
