1. Style, Strengths And Weaknesses

Style read: practical and combative, especially with Black. The most important practical clue is not a single opening name, but the repeatability of his early structures shown below.

Main strengths	Main weaknesses
large public sample with repeated tournament structures, so his main habits are visible; clear White comfort zone around London System, Queen-pawn with c4; clear Black comfort zone around Sicilian ...Nc6 systems, KID / ...d6 fianchetto; recent activity in the sample, so old repertoire notes should not be used alone	predictable first-move families as White if you prepare the exact move order; repeated Black structures that let you choose a targeted anti-system rather than broad prep; some repertoire clustering: he can be made to solve a prepared branch rather than choose freely

Fianchetto shell note: in 58 d4/flank games where he used ...Nf6/...g6/...Bg7, the split is ...d6/KID-ish: 35, ...d5/Gruenfeld-ish: 21, no early d-pawn: 2. Use the early d-pawn choice as the cue: ...d6 means KID/Benoni thinking, ...d5 means Catalan/Gruenfeld-style central pressure.

5. Game Plan For Lachlan

If You Are Black

Against d4/Bf4/Nc3 or London structures, use your anti-London/Jobava file: early ...Nf6, ...c5 or ...e6/...c5, make the centre matter before kingside pawns arrive.

Against 1.e4, choose your most familiar defence over novelty-hunting. He has enough open-game/Sicilian experience that a half-known sharp line is the real danger.

If You Are White

If you play 1.e4, expect Sicilian structures. Either prepare your main anti-Sicilian branch deeply or steer toward your Catalan/Reti comfort instead of giving him his best practical arena.

Against ...Nf6/...g6/...Bg7, stay in Catalan/Reti mode: c4, g3, Bg2, d4, keep central tension, and decide early whether dxe5/dxc5 clarifies in your favour.

Practical Match Plan

Do not chase tactics unless the forcing line is fully calculated; make compensation prove itself.

Trade into better structure when he accepts isolated pawns, backward pawns, or a weak colour complex.

Prepare one forcing branch against the top repeated setup, then spend the rest of prep on plans and pawn breaks rather than memorising sidelines.

6. Before-The-Round Checklist

Review your anti-London/Jobava file and the exact d4/Bf4/Nc3 move-order issue.

If considering 1.e4, review your anti-Sicilian choice or choose Catalan/Reti to avoid his repeated Black family.

Review White rep / Reti and Catalan files against ...Nf6/...g6/...Bg7; decide dxc5/dxe5 trigger points.

Bring one practical target to the board: a pawn break, a trade into better structure, or a line that removes his favourite attacking plan.

His White	Queen-pawn with c4	1. d4 Nf6 2. c4 c5 3. d5 g6 4. Nc3 Bg7 5. e4 d6 6. Be2 O-O	Prepare the pawn break and piece placement, not just the first two moves.
