1. Style, Strengths And Weaknesses

Style read: low-sample, practical repertoire clues only. The most important practical clue is not a single opening name, but the repeatability of his early structures shown below.

Main strengths	Main weaknesses
clear White comfort zone around London System; clear Black comfort zone around Slav/Caro-style vs d4, Scandinavian Defence	predictable first-move families as White if you prepare the exact move order; repeated Black structures that let you choose a targeted anti-system rather than broad prep; small sample: avoid overfitting one game, but use the repeated early moves as the prep anchor

5. Game Plan For Lachlan

If You Are Black

Against d4/Bf4/Nc3 or London structures, use your anti-London/Jobava file: early ...Nf6, ...c5 or ...e6/...c5, make the centre matter before kingside pawns arrive.

If You Are White

Against the Scandinavian, aim for normal development and a lead in time. Do not overextend trying to punish it immediately; make him solve the queen/knight coordination.

Against his d4 defences, keep a clean positional plan: Catalan/Reti pressure, no early pawn grab unless you know the recovery route, and make his light-square pieces prove activity.

Practical Match Plan

Do not chase tactics unless the forcing line is fully calculated; make compensation prove itself.

Trade into better structure when he accepts isolated pawns, backward pawns, or a weak colour complex.

Prepare one forcing branch against the top repeated setup, then spend the rest of prep on plans and pawn breaks rather than memorising sidelines.

6. Before-The-Round Checklist

Review your anti-London/Jobava file and the exact d4/Bf4/Nc3 move-order issue.

Bring one practical target to the board: a pawn break, a trade into better structure, or a line that removes his favourite attacking plan.

7. Appendix: Representative Setups

Side	Setup family	Representative line	Read over the board
His White	London System	1. d4 Nf6 2. Bf4 d5 3. e3 c5 4. c3 Nc6 5. Nf3 Qb6 6. Qb3 c4	Challenge with ...c5/...e6 and do not let h4/g4 arrive for free.
His Black	Slav/Caro-style vs d4	1. d4 c6 2. c4 d5 3. Nc3 Nf6 4. Nf3 dxc4 5. a4 Bf5 6. e3 e6	Develop cleanly and punish early queen/pawn looseness without overpressing.
His Black	Scandinavian Defence	1. e4 d5 2. exd5 Nf6 3. Bb5 Bd7 4. Bc4 c6 5. dxc6 Bxc6 6. Nf3 e6	Develop cleanly and punish early queen/pawn looseness without overpressing.
